

Vermilion Oil and Gas Australia

Customer market : INDUSTRY \ Oil & Gas

Country: Australia

Facilities: Wandoo Assets

Short description: Multidiscipline Engineering Support

Main Features (detailed description)

- **Services** ASSET SUPPORT
- **Business** ASSET SUPPORT / Maintenance Engineering

Detailed Presentation

Plexal Group has been providing engineering support to **Vermilion Oil and Gas's (VOGA)** Wandoo assets since 2005. These services include several secondments and home office support to numerous projects including:

- Wandoo "A" relieving including ROV and diving ops;
- Floating and submarine hose replacement complete with mid depth buoy;
- Gas turbine air intake replacement (3 off);
- Chemical injection skids replacement and day tanks;
- Tricon upgrade and software support for process upgrades;
- Numerous access platform designs;
- Reverse osmosis plant replacement;
- Noise reduction initiatives;
- Instrument upgrades;

Over A\$5,000,000 of engineering services have been provided to date.

Key Features

- Direct secondment of people into **VOGA's** office has accelerated understanding of the clients requirements and processes.
- Involved with all aspects of ensuring both assets operate within the codes.

Plexal Group provides multi-discipline engineering services to:

1. Support engineering change requests (ECR's);
2. Support capital works projects;
3. Provide personnel on secondment embedded into **VOGA's** Perth office;
4. Provide major site activity support as required e.g. planned shutdown and construction activities.

Additional Information

- Requirement for cost effective, high value multi-disciplined engineering support;
- Contract awarded in 2006 and is ongoing.
